

EXPERIMENT 4

ROLL NO: 240701301

NAME: S. MAHALAKSHMI

Create a prototype with familiar and unfamiliar navigation elements. Evaluate ease of use with different user groups using proto.io

Screen 1: Welcome Screen

This is the entry screen of the coffee ordering application where users begin their interaction with the app.

Familiar Elements

1. “Get Started” Button

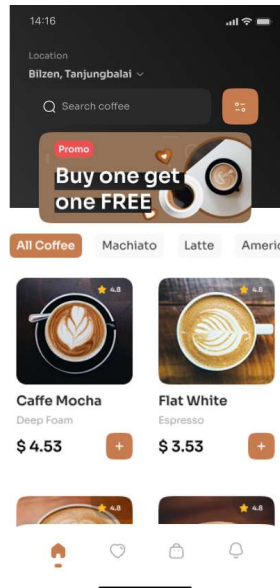

- A common call-to-action button used in many mobile apps.
- Clicking this button typically takes the user to the main interface of the application.

2. Status Bar (Time, Signal, Battery)

- Located at the top of the screen.
- Standard mobile interface element showing device status information.

Screen 2: Home Screen

The home screen allows users to browse coffee products and explore available options.

Familiar Elements

1. Search Bar

- A commonly used UI component for finding items quickly within an application.

2. Category Tabs (All Coffee, Macchiato, Latte, etc.)

- Used in many shopping and food apps to filter products.

3. Product Cards

- Display product image, name, rating, and price.

4. Bottom Navigation Bar

- Includes icons such as:
 - Home
 - Favourites
 - Bag
 - Notifications
- A very common navigation pattern in mobile applications.

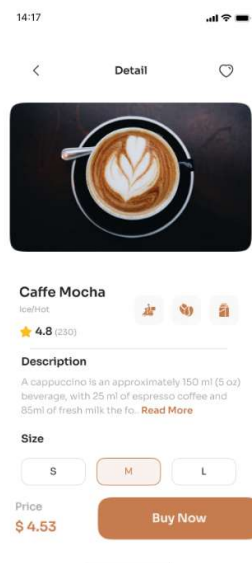

Possibly Unfamiliar Elements

1. Floating Filter Button

- The filter icon beside the search bar may not be immediately recognized by new users.

Screen 3: Product Detail Screen

This screen provides detailed information about a selected coffee product.

Familiar Elements

1. Back Arrow (←)

- Located at the top left corner.
- Used for returning to the previous screen.

2. Favourite Icon (Heart)

- A universal symbol used to save or like an item.

3. Size Selection Buttons (S, M, L)

- A standard UI element used in food ordering apps.

4. Buy Now Button

- A common call-to-action for purchasing a product.

Possibly Unfamiliar Elements

1. Ingredient Icons

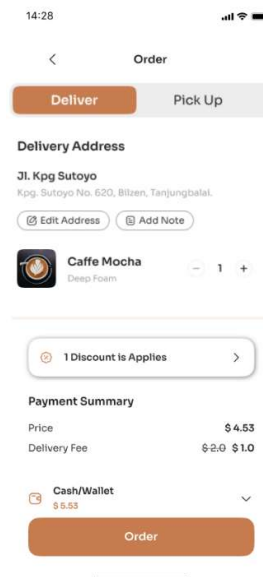

- The small icons representing coffee components may not be instantly understandable to first-time users.

2. Milk Can Icon:

- The milk can icon representing the type of milk used to make that specific coffee, along with the quantity of the milk.

Screen 4: Order / Checkout Screen

This screen shows the order details and allows users to confirm their purchase.

Familiar Elements

1. Delivery / Pickup Toggle

- Frequently used in food delivery apps.

2. Quantity Selector (+ / -)

- Standard interface for adjusting item quantity.

3. Payment Summary Section

- Displays pricing breakdown.

4. Order Button

- Final step to place an order.

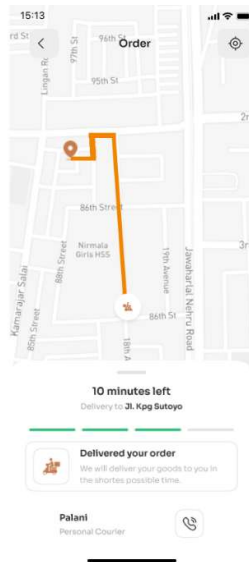

Possibly Unfamiliar Elements

1. Discount Notification Card

- The placement and interaction style may not be obvious for some users.

Screen 5: Order Tracking Screen

This screen shows the live status of the order delivery.

Familiar Elements

1. Map View

- A commonly used feature in delivery apps like food or ride-sharing services.

2. Progress Indicator

- Shows stages of the delivery process.

3. Courier Contact Option

- Allows communication with the delivery person.
